DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 9, 11, and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are not to a copolymer and a silane but should be to a combination of two monomers or to a premixture of g-APS and 2-APS that is polymerized. Claim 30 the suitable substituent is indefinite.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liu et al. [6277535] in view of Yu [5660961]. Liu et al teaches the use of an undercoating in an electrophotographic imaging member having a silyl-functionalized polymer of two silane compounds. The undercoating layer is a charge blocking layer as taught by Yu note Col. 21 –25. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the

organosilane as the compounds in an electrophotographic photoconductive imaging member to control the movement of charges in an electrophotographic element.

5. Claims 7, 10, 12-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
